Terms and Conditions

This offer is only available to channel partners on an approved basis. Speak to your BDM with regards to qualifying.

This offer is applied to new SIP Trunking endpoints and relates to calls to UK Mobile destinations only. The offer doesn't apply to existing end-points or any end-point (IP address) that has been previously provisioned on the Gamma system and excludes International Mobile Destinations. We reserve the right to monitor channel partners in regards the cease and re-provision of endpoints, with mis-use subject to the removal of the offer.

Only end-points connected to a dedicated business PBX qualify for this offer. Free Calls to Mobile is not available to IPHC customers.

Free Calls to Mobile is subject to a Fair Usage Policy.

Gamma monitors all SIP-Trunking usage and any qualifying end-point must not exceed 2000 minutes per channel per month – the Fair Usage Limit. Gamma reserves the right to disconnect any end-point where usage is deemed illegitimate or excessive in terms of standard use and in line with the Fair Usage Policy.

The total number of calls per channel from an endpoint shall not exceed 2,000 minutes per month to a UK mobile number (country code UKN, city code starting FM) . Should any endpoint exceed this amount in any month, the channel partner will be notified of the breach and given an opportunity to increase the number of channels to incorporate the additional minutes. If this is opportunity is not taken, Gamma reserve the right to charge a per minute price for the total volume of calls generated from that endpoint according to the standard, or existing IP rate card associated with the account.

Gamma will provide total cost details for the mobile calls so that Channel Partners can have the flexibility to charge the calls to the end customer if required, and view the level of discount this offer is providing.

Once an end-point is live, this special pricing is offered until the end-point is ceased. However, Gamma reserves the right to withdraw the offer from Channel Partners that materially reduce their overall spend on all services with Gamma from their current billing levels. The contractual period of notice will be given prior to any withdrawal.

The offer will be subject to a 3 year commitment where early termination clauses will apply: Partners will be billed their current channel rental charges for each month up to the end of the term if they cease an endpoint within the 3 year term.

Gamma reserves the right to claim back the discounts provided if the number of channels on an endpoint reduces to less than 50% of the maximum number of channels on that endpoint over the term. The billing description will be unchanged.
